

LONG-RANGE LED FLASHING BEACON

MBL 400

The MBL 400 is a LED flashing beacon of medium and long range, with a great optical output. Its luminous source consists of high-power LED diodes, obtaining a range of up to 27 nautical miles.

Intended to be placed in on-shore aids-to-navigation locations, such as poles and towers, with a minimum maintenance.

Fitted with 9 nos. optical elements by level, arranged in a circular way in a 300mm diameter, made from UV-resistant methacrylate and protected with a shock-resistant glass lens cover. Manufactured with high-quality and resistant materials, the MBL 400 provides a long service life under very severe marine conditions.

Designed according to IALA Recommendations.
