

Mediterraneo's GRP towers, model MTP, are engineered to integrate flashing and rotating beacons c/w their solar power supply system, in order to operate as medium- and long-range Lighthouses.

These towers are manufactured from GRP (glass-reinforced polyester). Colour is pigmented in the raw material, thus the tower colour remains unaltered. Thanks to its watertightness, batteries, control units and other items can be housed inside the tower, in order to be protected from the weather.

MSM bears in mind the difficult access to places where they will be installed; so we take special care of this factor in our designs by making all our towers modular.

Their large surface allows to obtain a day mark according to IALA Recommendations.

FEATURES

- ✓ Manufactured from glass reinforced polyester (GRP).
- ✓ Colour impregnated in the GRP, no need to repaint.
- ✓ Heights from 3,5 to 10 metres.
- ✓ Easy assembly, due to its modular architecture.
- ✓ Fast erection without crane.
- ✓ Spacious sized top platform to hold solar modules and batteries.
- ✓ Tower accessories and bolting made from stainless steel.
- ✓ Wind-speed resistance higher than 180 kph.
- ✓ Inner access ladder.
- ✓ GRP plates with rings for easy lifting.
- ✓ Access door with safety lock.
- ✓ Provided with templates for accurate anchor bolt positioning.
- ✓ Very useful as day mark.
