MCL 140

The MCL 140 is a mini LED marine lantern, solar self-contained, which utilises one only high-power LED, giving a luminous range up to 5 nautical miles. It is characterized by its excellent optical system performance, minimising consumption and offering a big autonomy.

Ideal for short-range beaconing applications, on- and off-shore, requiring a low consumption, such as jetties, piers, buoys, fish farms, etc.

The battery is replaceable, thus the complete lantern disposal is not necessary at the end of battery’s life. Standard fixings allow for a quick beacon replacement.

Designed according to IALA Recommendations.
