The STECA PR Solar Charge Controllers have been specially designed for operation in difficult environments with high salt, moisture and dust contents.

The PR 2020 IP is equipped with a large LCD display that shows the current state of charge (SOC) as a percentage and graphically in the form of a tank. This visual representation also provides operating parameters, failure messages and self-test.

The “auto-adaptive” state of charge algorithm results in optimal battery maintenance and control over the module output of up to 480 Wp, which can be connected to it.

Manufactured according to ISO 9001 and 14001, RoHS, European Standards and DIN IEC 68 part 2-30 (use in tropical areas).

Features:

- Hybrid controller.
- State of charge determination with Steca AtonIC (SOC).
- Automatic detection of voltage.
- PWM control.
- Multistage charging technology.
- Load disconnection depending on SOC.
- Automatic load reconnection.
- Temperature compensation.
- Common grounding on one or several positive terminals, or negative grounding on one terminal.
- Integrated data logger.
- Integrated self test.
- Monthly maintenance charge.
- Integrated energy meter.
Solar Charge Controllers

STECA PR

Certifications
- European Standards ✔ ✔
- DIN EN ISO 9001:2000 ✔ ✔
- DIN EN ISO 14001 ✔ ✔
- DIN IEC 68, part 2-30 (use in tropical areas) ✔ ☓
- RoHS ✔ ☓

Electronic protections
- Overcharge.
- Deep discharge.
- Load disconnection against over-discharging.
- Reverse polarity protection of solar modules.
- Reverse polarity protection of load and battery.
- Short-circuit protection of solar modules.
- Short-circuit protection of load.
- Over-temperature.
- Over-voltage.
- Varistor protection against electromagnetic discharges.
- Open circuit protection.
- Reverse current protection at night.

Specifications subject to change without previous notice.
